

**Program 155 -- How the Universe Began (Minus the Guesswork)
(Great Chapters of the Bible—Genesis 1)**

Do you remember the hurricane on the East Coast that roared through a junk yard and left a miracle? Parts came together and created a car—I think it was a Dodge. It made the news around the world. Oh, you don't believe me?! You think my "Dodge" is dodging the truth. You're right. But you and your kids are digesting the same boloney called "evolution." Unless you want to be part of the "Rebels Against Truth" club, you've got to hear me out. It's about the universe and how it began minus the guesswork. Interested? Then join me—now—for "Prophecy, Politics, People, Power—More Than Talk."
