

PROGRAM 122 TEASER

It's a word that strikes terror in the strongest, boldest, most successful people. "You have cancer!" And most of us would go to any lengths to have that cancer removed from our bodies. Otherwise we know that it will eventually kill us. But there is something far deadlier that has invaded every human being. It's the cancer called SIN—and you can see its effect in broken lives, shattered marriages, destructive behavior and wars raging in human hearts. But while there is no final cure that man has found for cancer, God has the perfect cure for the cancer called sin. He says we're all infected with sin—even if we're living in denial. But He offers hope. Tom Hughes and Frank Eiklor about to tell you the discovery we've made: The Deadliest Cancer—The Only Cure. It's More Than Talk.
